

Co-Hosting/Co-Branding Hyperion SIG Webinars

As part of our continued effort to provide education to the community for all things Hyperion/EPM, we regularly run educational webinars with OAUG vendors and/or user members. These webinars are managed and hosted by the Hyperion SIG and are not OAUG sponsored webinars.

The process for hosting a webinar with the SIG is as follows:

The SIG will schedule and manage the registration for all webinars. We will also assist in marketing to all SIG members through email campaigns and on our various social media channels.

Presenters must use OAUG Webinar Template which will be provided by the SIG and can have their company information on a maximum of two slides per webinar.

Panelists will receive panelist/presenter details from the SIG and after the webinar has taken place the registration list will be sent to all panelists/organizers and will include: First Name, Last Name, Job Title, Company Name. All other contact information will not be provided per OAUG GEO/SIG guidelines which state:

OAUG and SIG/Geo will share mutual confidentiality of information with the provision that the OAUG can use SIG & Geo membership information for OAUG related business and communication. The SIG & Geo will not sell any membership information, or use or distribute the information for marketing, recruiting or any other non-SIG/Geo related business. – details:

Your webinar will normally be recorded and placed on the SIG site for the education of all SIG members.

If you have any questions, please email: hyperion@oaugsig.org.
